

Report of WAIK 1 Nyanza self help group 4/5/2011

Members have realized the need of working together .They have to set specific days for helping one another in their farms .The set aside days are; Monday, Wednesday& Friday.

The committee gave report that purifiers are used constantly. This was confirmed by the co-coordinator after visiting some homes.

The co-coordinator visited the health centers like: Ndhiwa, Lambwe & Ndisi to ask for the impact of using purifiers in relation to water born diseases. He was told that it was not easy to establish at once. This was so because all villagers are not using purifiers. This made him to rely on verbal reports from those who are using the purifiers.

They said that stomach problems have declined due to continuous use of clean water.

The villagers have held two meetings to discuss message sent to us by Johanness about the issue of additional purifiers f from Lion Organization. They have agreed to be given purifiers, initially they were prioritizing all funds to be directed to drilling bore hole, after explanation they have seen the need. Manga Hill villagers have known that you a knowledge their problems and you have them at your heart and you are the drivers to their rescue.

The co-coordinator will email the documents after it has been compiled by the Engineer .Original copy you'll get when you come.

Report Written By Committee Representatives &Compiled By The Co-coordinator,

TOM M NYANGOR,
NDHIWA

Cost of the report= Kshs. 60
